Giving individuals full ownership and control of their medical data

The Nigerian health record system is broken

In Nigeria and across Africa, patients do not own their medical records. Health data remains trapped in fragmented paper files and siloed hospital systems. Resulting in:

* Delayed treatment and duplicate tests
* Broken care continuity
* Doctors treating patients with incomplete information
* Pregnant patients or those managing hormonal issues cannot easily change location without re-starting the clinical baseline.

#1

97% of Nigerians struggle to access or share...

#2

80% of patients frequently repeat expensive tests...

#3

68% are highly concerned about the privacy...

Studies show that 97% of patients experience frustration with accessing their own medical records.

Many mentioned “Hospital delays”, “Lost papers”, “Have to repeat tests”

68% are highly concerned about the privacy and security of their medical data

High Privacy Concerns

Selorah Health gives every Nigerian full ownership and control of their medical data.

Secure storage ▪ Instant QR sharing ▪ Fair earnings from research

Selorah Health is a secure, patient-owned digital health passport that empowers users to:

- Store encrypted medical records (labs, prescriptions, vaccinations, etc.)
- Share records instantly with any doctor via **time-limited QR codes**
- Earn fair compensation when their anonymized data contributes to medical research

Transparent Revenue Model: 49% to patients | 21% to hospitals | 30% to Selorah (enforced on MONAD)

200 Million

Nigeria has over 200 million people with increasing healthcare needs

$12B+

African digital health market is projected to reach $12B+ by 2028

1.4 Billion

People in Africa with fragmented records

OUR BEACHHEAD

Nigeria's 5M+ middle-class and diaspora professionals, creators who already cross borders for healthcare, travel internationally, shoots, collabs, content and are acutely familiar with the pain of starting over with every new doctor. They are smartphone-native, frustrated, and ready.

Patients	Providers	Researchers
Freemium	*Subscription + Pay-per-scan*	*Enterprise plans*
Premium: ~~₦~~2000–4000/mo	*+ 21% research revenue*	*Access to consented data*
Unlimited shares	*Audit tools*	*Cohort analytics*

BOTTOM LINE Transparent 49 / 21 / 30 revenue split enforced on MONAD

Competitive Advantages

- ***What makes us unique?***

  Patient-first ownership + fair revenue sharing (49% to users)

- ***How will we outperform competitors?***

  Superior UX, time-limited QR sharing, and MONAD-powered trust layer

- ***Unfair Advantages?***

  Deep product design expertise + early mover advantage in patient-owned African health data

- ***How do we compare?***

  Hospitals get new revenue. Patients get control + earnings. Researchers get consented data.

Easy to use
Traditional Hospital EMRs / Paper Records
Selorah Health
Inefficient
Efficient
Generic Health Apps
Other Data Platforms

We are raising $40,000 in Pre-seed Funding

USE OF FUNDS:

- 50% — MVP Development & MONAD Integration
- 20% — Hospital Pilots & User Testing in Lagos
- 15% — Marketing & User Growth
- 10% — Security Audit & Legal/Compliance
- 5% — Operations & Tools

MILESTONES WITH FUNDING:

- Month 1–3:
  Complete MVP and Onboard first 1500 users + Two Hospital Pilots
- Month 4–6:
  Launch + First Research Earnings Distribution
- Month 6–12:
  Scale to 5,000+ **active** users

SELORAHEALTH@GMAIL.COM

To become the default personal health passport for Africans.

A country (and continent) where every person truly owns their health data, can access quality care anywhere without barriers, and is fairly compensated when their data contributes to medical advancement.

Thank you!
